## 1. Long Term Financial Planning

### 1.1. Purpose

Long term financial planning promotes thinking about the influence of changing circumstances on the decisions made about the service programs and the assessment of potential new projects and their impact on the future financial sustainability of Council business.

Financial planning is a guiding framework and so is an essential tool for responsible financial management. The importance is recognised in that long term financial plans are a requirement of the Local Government Act.

The preparation of this Plan forms the basis for identifying and quantifying service level standards and the future investment requirements to adequately maintain Council's infrastructure and asset portfolio.

### 1.2. Legislative Requirements

The Local Government Act 1999 requires Council to develop and adopt a Long Term Financial Plan covering a period of at least 10 years. This forms part of Council's suite of strategic plans that also include the Strategic Plan 2019-2029 (adopted October 2019) and Infrastructure Asset Management Plan (adopted July 2020).

Council is required to review the Long Term Financial Plan annually as soon as possible after the adoption of its Annual Business Plan and undertake a comprehensive review of its strategic management plans including Long Term Financial Plan within 2 years after each general election.

### 1.3. Influencing Factors

There are a number of external and internal factors which influence the assumptions used when preparing the Long Term Financial Plan.

These include:

#### External

- Australian and State Government new and reviewed legislation and policies
- Current and forecast economic environment
- Consumer Price Index (CPI) and Local Government Price Index (LGPI)
- Increasing impact of the pricing of power and water
- Interest rates

#### Internal

- Community expectation
- Asset Management Plan
- Financial sustainability target and goals
- Increase or decrease in service levels (current and future)
- Workforce Planning and Enterprise Agreement conditions and pay rates
- Treasury management and the need for borrowings

## 2. Assumptions

### 2.1. General Assumptions – Nominal Values

All income and expenditure have been stated at their nominal value.

### 2.2. General Assumptions – Consumer Price Index

Unless known not to be indexed all income and expenditure are indexed for inflation at 2.2% based upon the all capital cities Consumer Price Index for March 2020 quarter.

### 2.3. Rate Revenue

Annual rate increases are forecast at 2.9% which includes 0.5% growth for the life of the plan. Council has considered the organisations future financial sustainability as well as the community's capacity to pay in determining future increases in general rates.

### 2.4. Rate Revenue – Regional Landscape Levy & Service Charges

The Regional Landscape Levy is assumed to increase by CPI.

In 2020/21 the waste collection for kerbside waste, general and recycling, will move to full cost recovery excluding transfer station costs. This will increase the fee to \$211. In 2021/22 a new kerbside green waste collection service is forecasted to commence with full cost recovery.

Council's CWMS is forecasted to move to full cost recovery in 2021/22.

### 2.5. Grant Revenue

Grant revenue has been assumed to remain consistent with the 2019/20 financial year for Financial Assistance Grants and other ongoing funding. It has been assumed that Roads to Recovery will continue per the current agreement through to 2023/24.

All other grant timings are included based on their current funding agreement.

### 2.6. Investment Income

Interest earned on cash balances and term deposits is calculated by multiplying the available cash at 30 June by the assumed interest rate which is 0.25% for the life of this plan.

Interest from loans given to community groups, is calculated based on the loan schedule.

### 2.7. Employee Costs

In the 2020/21 financial year Council has committed to including one (1) new positions within the organisation. This is for an Engineer – Technical Lead.

## 2.8. Depreciation

Depreciation is calculated based on current valuation data to determine fair value and useful life allowing for changes in prices. Additional depreciation is included for asset acquisitions made over the life of the plan.

## 2.9. Other Costs

Other costs include contributions to the Clare Oval Redevelopment Committee project in 2020/21 and 2020/22 of \$1,002,000 and \$381,000 respectively. All other costs have been indexed annually by CPI.

## 2.10. Asset Disposals

In 2020/21 it is assumed that a lease will be signed for the Clare Caravan Park. Other disposals in 2020/21 include the replacement of plant. Plant disposals continue for the life of the plan with the assumption that Council will receive a sale price equal to the written down value on the asset register.

In 2021/22 it is assumed that a property will be sold. All buildings for disposal or divestment will be subject to council approval and public consultation.

## 2.11. Capital Expenditure

Renewal/replacement and new/upgrade capital expenditure within the Long Term Financial Plan is indexed based upon spending contained within Council's Infrastructure Asset Management Plan.

## 2.12. Borrowing and Finance Costs

Council will be required to take on additional borrowings during the term of this Long Term Financial Plan as well as repay all borrowing currently held within agreed terms. The following table details the levels of borrowings and related interest rates for each year.

Year	Total Outstanding 30 June	Weighted Average Interest rate
2020/21	2,745,753	7.67%
2021/22	2,370,188	7.75%
2022/23	2,188,122	7.76%
2023/24	2,529,258	6.66%
2024/25	2,360,221	6.59%
2025/26	1,680,207	7.77%
2026/27	1,491,446	7.77%
2027/28	1,287,733	7.77%
2028/29	1,067,885	7.77%
2029/30	830,622	7.77%

### 3. Financial Sustainability

A council is financially sustainable if it achieves

- a positive operating surplus/(deficit) ratio over time – indicating a surplus of income over expenses which can be applied to future proposed capital expenditure, reducing debt or increasing financial assets,
- a reducing financial liabilities ratio unless the council is increasing or improving its physical asset base, and
- an asset renewal funding ratio of between 90% and 110%, which shows the council is renewing assets when required to retain agreed service levels.

#### 3.1. Operating Surplus Ratio

An operating surplus (or deficit) arises when operating income exceeds (or is less than) operating expenses for a period (usually a year). Over time Council will be financially sustainable when its expenses are less than income. The operating surplus ratio expresses the surplus (or deficit) as a percentage of total operating income.

Council has considered carefully how it can return to a trend of small to marginal operating surpluses over time. Past years have seen the Council absorbing increased operating expenses arising from price pressures and service level increases. In some instances it has done so without increasing service charges and general rates. The forecasts in this Long Term Financial Plan have incorporated principles of full cost recovery for the CWMS and Waste Service as well as committing to providing service levels that the community can afford in a way that is equitable for the current and future generations of ratepayers. As a result Council forecasts it will move to achieve an operating surplus in 2022/23, with ongoing surpluses from 2026/27 onwards.

### 3.2. Net Financial Liabilities Ratio

Net financial liabilities are defined as total liabilities less financial assets. These are expressed as a percentage of total operating revenue and provides information on Council’s overall indebtedness. Where the ratio is falling it indicates that Council’s ability to meet its obligations is strengthening.

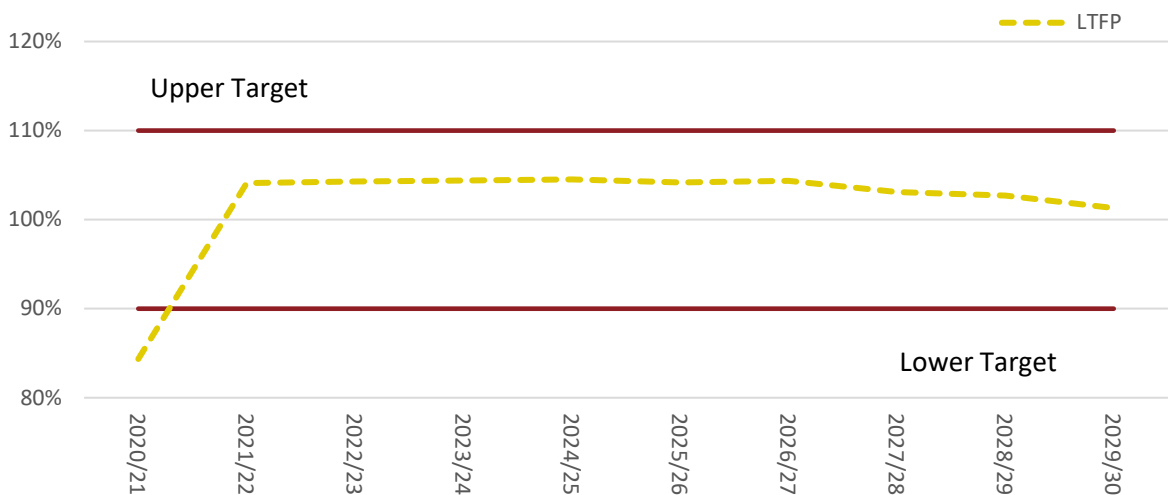

To ensure the ongoing renewal of Councils aging assets, and to fund new projects, additional borrowing will be required in 2023/24 and will be repaid by 2025/26.

### 3.3. Asset Renewal Funding Ratio

The asset renewal funding ratio expresses the total expenditure on asset replacement and renewal as a percentage of the indexed expenditure required per Council’s Infrastructure Asset Management Plans.

Council will commit to undertaking the renewal and replacement of its infrastructure and other assets at the optimum time to achieve the service levels it has agreed within its Infrastructure Asset Management Plan over the period of the Long Term Financial Plan.

#### 4. Future Council Considerations

During the Council's deliberations in finalising the Long Term Financial Plan it considered the level of service it provides to the community and the related cost. Possible future service level changes considered but not included in the Long Term Financial Plan include;

- The disposing of buildings which are surplus to service delivery requirements.
- Inclusion of a special levy to raise funds to support the tourism sector.
